

COTX FlexiMining - Beta testing - enable Mysterium @ X3 workflow

1. Active Mysterium @ COTX Hotspot Web Management

★ Login your COTX Hotspot Web Management → choose FlexiMining.

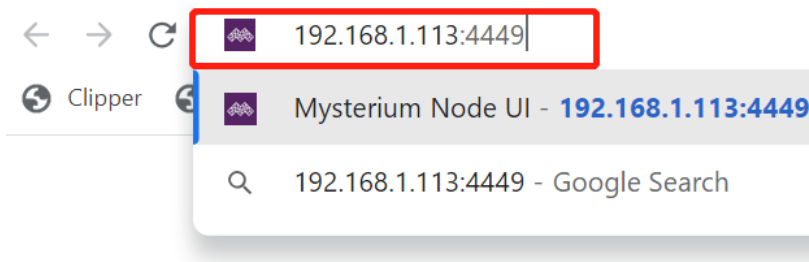

★ Choose MYSTERIUM, click "Installation Notes", review the terms, then click "Active":

Then the Mysterium Mining Node would be installed to your X3 automatically.

2. Set up Mysterium Node

★ Once it is installed, you may access Mysterium Node UI by opening your web browser:
you hotspot local ip address:4449, for example:

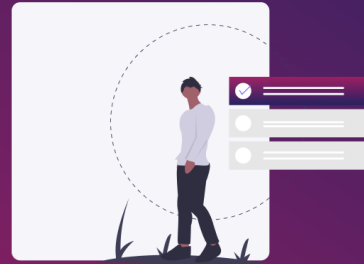

Sample:

Welcome node runner!

Lets get you up and running.

START NODE SETUP

★ Pay the fee to add the Mysterium Node into the Mysterium network. This is charged by Mysterium not COTX.

You can use credit card if you do not have MYST token.

Network Registration

To register your node on blockchain you can either transfer required amount of MYST or pay 1 USD/EUR/GBP

- ☐ Deposit MYST token
- ☐ Pay with PayPal (1 USD/EUR/GBP)
- ☒ Pay with Credit or Debit card (1 USD/EUR/GBP)

You will be charged 1 USD/EUR/GBP plus applicable VAT. Please select your currency and country of residence below to proceed.

Note: After clicking PAY NOW below, new tab/window will be opened and you will be redirected to payment processing partner to complete transaction.

★ You must provide a wallet address to link to the Mysterium Node.

Withdrawal settings

Add your ERC-20 Polygon compatible wallet for automatic withdrawals

Withdrawal Address (required)

0x...

Make sure withdrawal address is from ERC-20 Polygon compatible wallet (e.g. MetaMask or MyEtherWallet)! [Check here for instructions how to setup MYST token on MetaMask.](#)

NEXT

★ Create your e-wallet for \$MYST coin, if you do not have one:

\$MYST Wallet requirement

Make sure withdrawal address is from ERC-20 Polygon compatible wallet (e.g. MetaMask or MyEtherWallet)! [Check here for instructions how to setup MYST token on MetaMask.](#)

NEVER forget your 12 words when you setup your e-wallet for your \$MYST! No one can recover it for you!

★ Once you get wallet address, back to Mystery Node input wallet address:

Withdrawal settings

Add your ERC-20 Polygon compatible wallet for automatic withdrawals

Withdrawal Address (required)

0x83517 [REDACTED] d6690|

Make sure withdrawal address is from ERC-20 Polygon compatible wallet (e.g. MetaMask or MyEtherWallet)! [Check here for instructions how to setup MYST token on MetaMask](#)

NEXT

★ Setup your Mystery Node UI access password:

Node settings

Fill in the following information to finish setting up your node.

Please create default WebUI password. At least 10 characters are required.

Node UI password

Repeat password

Claim this node in mystnodes.com

SAVE & CONTINUE

★ Make sure you check "Claim this node in mystnodes.com", this would help you add your Node into Mystery cloud portal:

Node settings

Fill in the following information to finish setting up your node.

Please create default WebUI password. At least 10 characters are required.

Node UI password

●●●●●●●●●●

Repeat password

●●●●●●●●●●

☒ Claim this node in mystnodes.com ?

API Key ([Get it here](#))

If you claim your node you will be able to manage and see statistics for all your nodes in mystnodes.com

Your API token

SAVE & CONTINUE
